Elgorithm organized a 3-month relief response to provide aid to affected families.

How did we help?

Vulnerable families were provided with direct relief aid

Individuals were connected to our life-sustaining aid packages

Women were provided with vital access to feminine hygiene products

Beneficiaries consisted of individuals and families who were unable to connect to aid due to nationality, or migrant status (under the Kafala system, or forced migrants from Palestine or Syria).

Identified beneficiaries were provided with life-sustaining 'care-package' boxes that included:

- Pantry staples and life-sustaining nourishment essentials
- Personal hygiene materials
- COVID-prevention kits, including masks, disinfectant sprays, & more
